## **AUSTSWIM Teacher of Infant and Preschool Aquatics™ Course**

The AUSTSWIM Teacher of Infant and Preschool Aquatics™ course is designed to provide teachers with the required competencies to teach infant and preschool aquatics.

An extensive review of the AUSTSWIM Teacher of Infant and Preschool Aquatics™ course has recently concluded. The review has focused on all aspects of the course and has resulted in significant changes to the course including its resources and the way in which the course is delivered. AUSTSWIM are extremely pleased with the development of the course and its resources and are excited to announce their arrival to the industry.

A summary of the changes includes:

- New course manual (in full colour, contains a high percentage of photos and helpful teacher tips)
- New presenter resources
- Introduction of an e-learning centre

### ***Introducing e-learning***

The e-learning centre being used to enhance the AUSTSWIM Infant and Preschool Aquatics™ course is of major significance and has greatly changed the way courses are delivered. It has been designed to remove limited theoretical information from the traditional methods of course delivery. Theoretical assessment is included within the e-learning material resulting in assessment tasks being completed progressively through the candidates learning.

### ***Course delivery in 1 day***

As a result of the introduction of the e-learning centre, the traditional presenter lead theory and practical sessions will now be able to be delivered in a single day. Sessions covered during this day include:

- Water familiarization
- Aquatic skill development
- Plan, deliver and review a lesson

For further information on the course, including dates and availability, please contact your local AUSTSWIM Business Centre or Course Provider.
